The first of these is the fact that the
 population of the country has increased
 very rapidly since the year 1800. This
 has been due to a number of causes,
 but the principal one is the increase
 in the number of children born to each
 family. This has been the result of
 the fact that the people have become
 more civilized and have adopted the
 habits of the more advanced nations.
 They have learned to value their children
 more highly and to take better care of
 them. They have also learned to
 marry at an earlier age and to have
 more children. This has led to a
 rapid increase in the population of the
 country.
